## LOCATION & ASSIGNMENT OF CREWS

### ELEVEN MILE – ID-SCF-015218

STATE: Idaho

ICP is located in Challis, ID; approximately 148 miles northwest of Idaho Falls, ID. Fires within the complex are located approximately 30 minutes west of Challis, ID.

There was minimal activity on yesterday. Following the heavy precipitation event Friday morning, cooler temperatures and good nighttime recoveries have extinguished a large portion of heat on the fire, even where no suppression actions have occurred. Some heat does remain however. These remaining pockets are expected to continue increasing in energy and potential for fire growth. Tomorrow continues a warming and drying trend in which fire behavior will slowly, steadily increase, especially in the north portion of the fire where no suppression actions are being taken and fire is being allowed to play its natural course as it burns towards the wilderness boundary.

IMT is beginning to reduce resources in all Divisions – including air resources.

Crews in Division K will continue to construct shaded fuel breaks and conduct hazard tree removal operations.

### TEPEE SPRINGS – ID-PAF-000192

STATE: Idaho

ICP is located in New Meadows, ID; approximately 12 miles northwest of McCall, ID near the Salmon River, and approximately 2.5 hours north of Boise, ID.

VA State crew remains in Branch 2 at spike camp and will continue to provide structure protection along Hwy 95 and be available for IA.

## IARR DAILY CREW REPORT

Name of Module

**TN-TNC-04** crewmember had no issues on the line yesterday. Therefore, the crewmember will not be taken to the local Clinic as originally planned.

**VA-VAST-01** crewmember is doing well – currently staged at spike camp with crew.

**KY-JCC-01** crewmember was transported to Steele Memorial Hospital (Salmon, ID) on yesterday, 09/07 and treated for dehydration. IARR (t) E. Hunter was contacted by Finance Section Chief at approximately 1800 to meet medical transport and local IBA/Incident Business Specialist at the hospital.

Crewmember complained of light-headedness and severe stomach cramps/pain. Medics administered fluids and pain medication intravenously to treat symptoms during transport to the hospital. Upon arrival, medical staff collected blood and urine samples to confirm diagnosis. Crewmember was released at approximately 2240 to E. Hunter.

**NC-NCS-02** crewmember reported to the Medical unit with flu-like symptoms. The crewmember was given medication to treat symptoms and released for duty. E. Hunter purchased Emergen-C for crew on 09/07, per crew boss's request.

### MESSAGE:

Elevenmile DIVS (Division K) indicated Knoxville Module #4 crews may be released on Wednesday. This information was confirmed by Operations. DIVS also mentioned the Great Basin GACC was seeking additional assignments for the crew.

IARR Smalls and IARR (t) Hunter will contact Great Basin GACC today to seek additional information.
